

VT30

Android Video Speakerphone

for home use

Model VT30 merges the flexibility of the Android OS with the reliability of analog speakerphone. Android's superior graphical user interface means that you can spend less time figuring out how to navigate your phone, and more time just using it. Customize your phone's look to make it yours.

This smart home phone sets your conversations free with simultaneous voice, video, and text communications.

Know immediately who's calling from across the room: watch their profile photo and number pop up on VT30's full color display. Set up your phone book just once with Android Contacts. Your home and mobile directories can be fully synchronized.

VT30 offers the reliability, crystal-clear voice clarity, and no-fuss installation you expect from landline phones-while bringing your phone to the cutting-edge in internet-based telecommunications.
